Activity Part One: Next Steps for Building a Local Strategy for Reconnection.

What Do We Know?

Activity Part Two: What Do We Have, What Do We Need, and Where Can We

Find It?

Beginning to Conceptualize a Local Strategy

Adjourn

Promoting the Well-Being
of Maryland's Children

Today's Objectives

The purpose of this presentation is to:

- Provide a **basic overview** of youth disconnection from a national, State, and wherever possible, local perspective;
- **Inform local planning** through research and analysis of best and promising practices for reconnecting youth;
- Equip participants to **begin conceptualizing local strategies** for addressing this population, including:
 - Identifying the local disconnected population and/or recognizing where to find them;
 - Recognizing specific barriers to school and work;
 - Identifying gaps in local data and services;
 - Identifying necessary stakeholders and beginning to consider how they might be engaged.

Promoting the Well-Being
of Maryland's Children

A National Crisis

- Almost **six million** youth ages 16-24 are out of school and work.
- Reached peak during 2007-2008 and has mostly **stayed static**.
- Impacts **every State**, in rural, suburban, and urban areas.

What's Going On?

Two groups of youth are being left behind:

- Youth ready to work, but do not possess the skills that employers want
- Youth not ready to work because of individual and systemic barriers

Promoting the Well-Being
of Maryland's Children

Impact and Opportunity

On youth:

- 2x more likely to live in poverty
- Poor physical and mental well-being
- Poor social bonds

On communities:

- Higher crime rates
- Increased social services
- Lost revenue

*If the current cohort were working, the impact on our economy would be **\$4.7 trillion** over their lifetime.*

Promoting the Well-Being
of Maryland's Children

Subpopulations

Disconnected youth are a heterogeneous group made up of varied subpopulations with different needs.

Educational Attainment

- *Dropped out of high school (31%)*
- *Have a high school diploma (47%)*
- Earned a college degree (4%)

Key Risk Factors

- *Living below poverty*
- *Parental unemployment*
- *Physical or mental disability*
- *Homelessness or insecure housing*
- *Transitioning from systems*
- *Living in racially segregated neighborhood (negative result unless white)*

Race

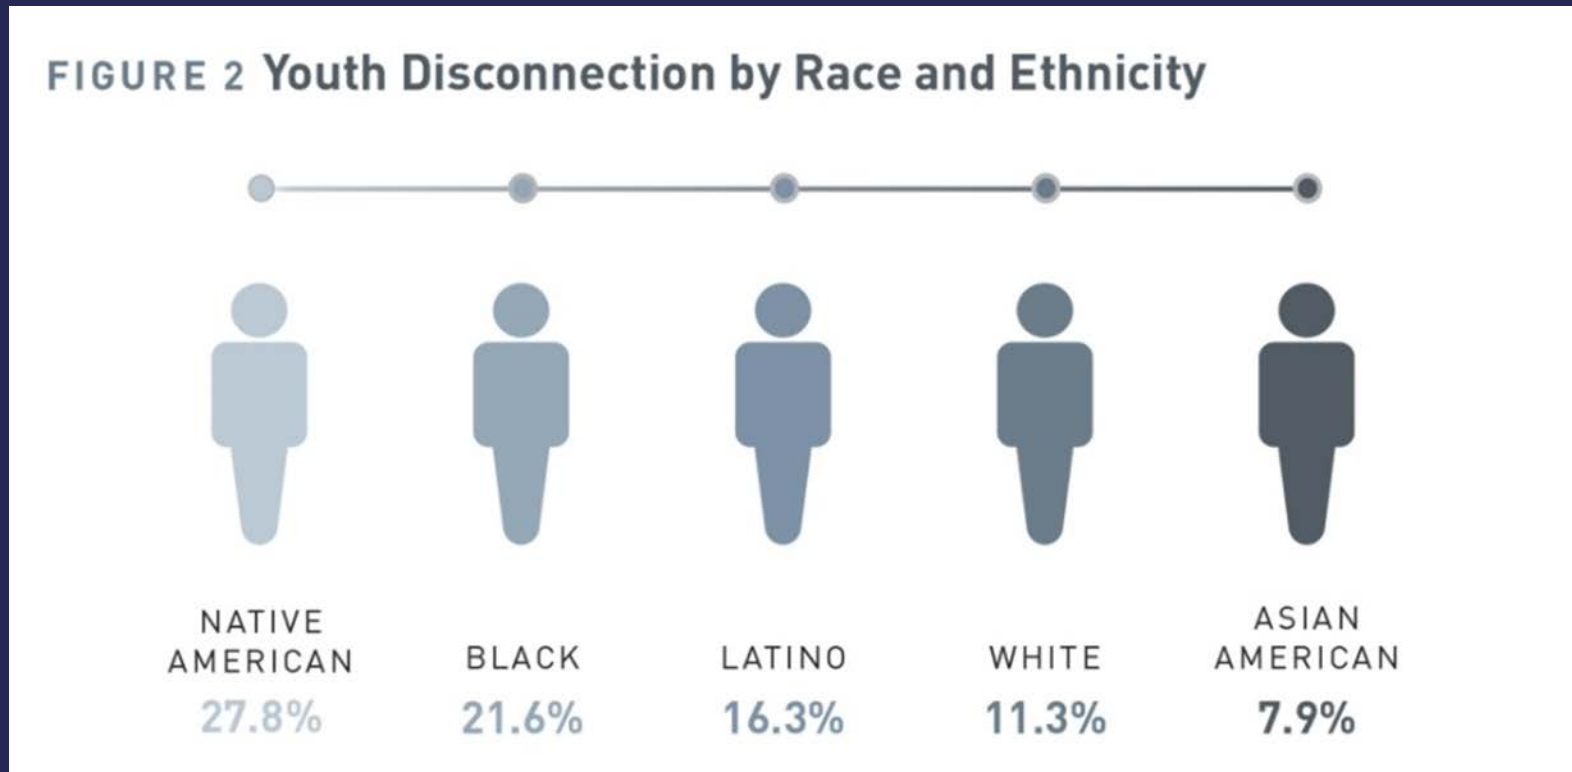

- *Black (21.6%)*
- *Native American (20.3%)*
- *Latino (16.3%)*
- White (11.3%)
- Asian American (7.9%)

Gender

- Males (53%)
 - *Black males (25%)*
- Females (47%)
 - *Mothers (33%)*

Racial Disparities

Wide disparities exist among disconnected youth by race.

Nationally, Latino or Hispanic disconnection is starting to show signs of improving. Black or African-American disconnection is not.

Statewide

There are more than 85,000 disconnected youth in Maryland.

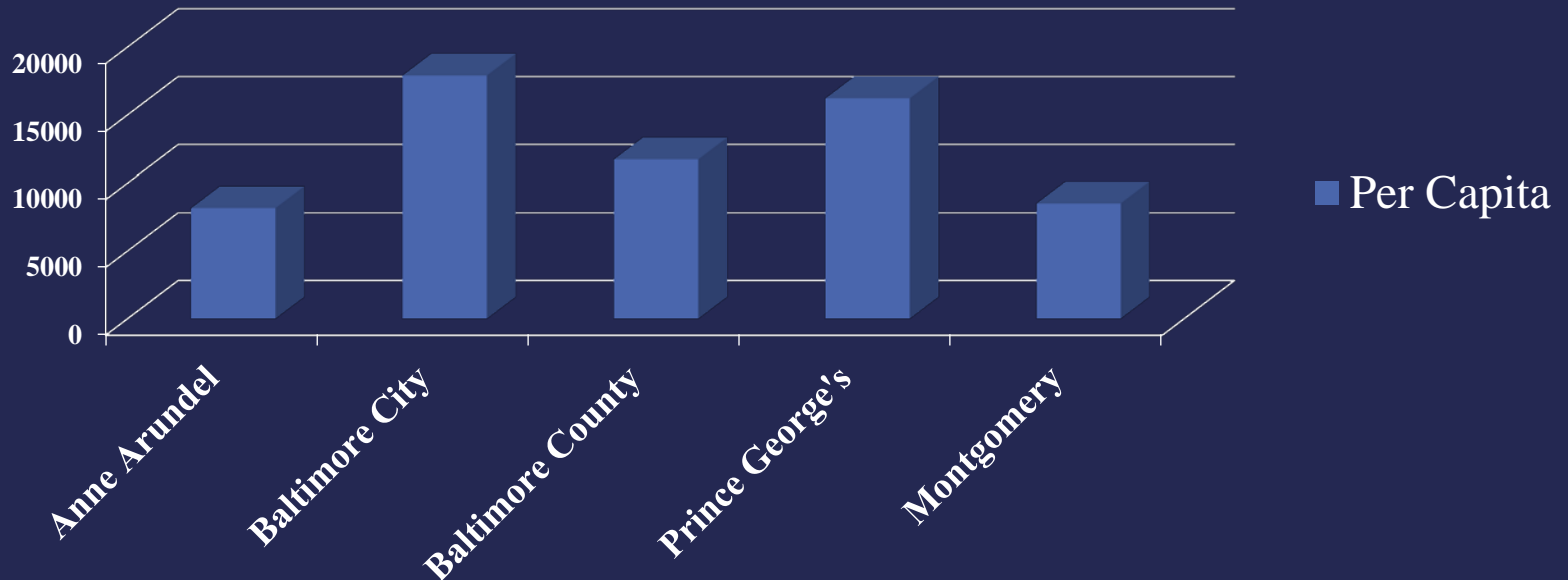

- Affects the entire state
- 11 juris. have higher rate than national average.

Statewide

Relatively low percentage of youth population disconnection? Don't get excited:

- Anne Arundel, Baltimore, Prince George's and Montgomery have the most per capita disconnection.

Statewide By Gender

Promoting the Well-Being
of Maryland's Children

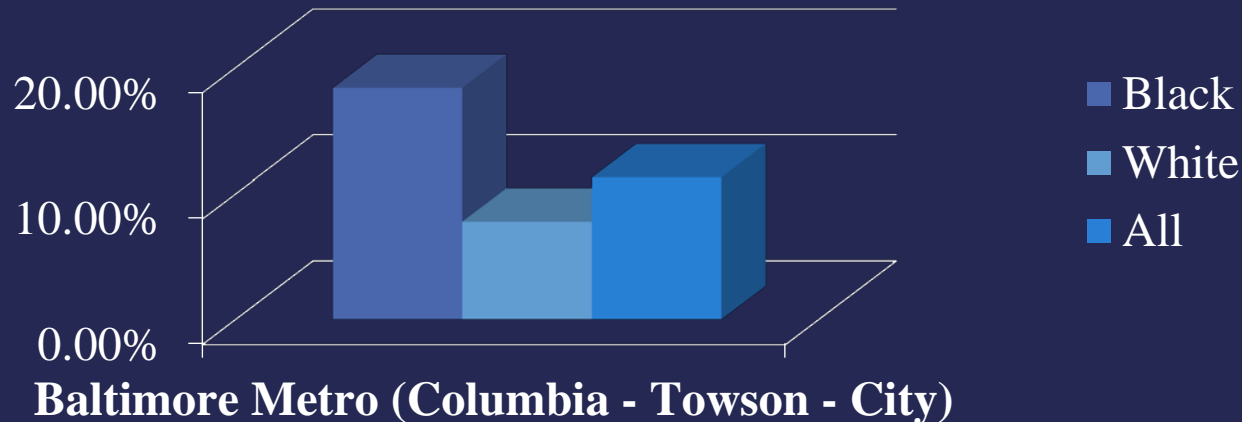

Males and females similarly likely to be disconnected:

Unemployment Rate by Age and Gender				
	Males 16-19	Males 20-24	Females 16-19	Females 20-24
United States	31.1%	17.7%	25.8%	14.5%
Maryland	29.8%	17.6%	24.4%	14.1%

But: rates of disconnection by gender can vary by jurisdiction, so it's important to collect local data.

Statewide Racial Disparities

Wide disparities exist among disconnected youth by race.
One approach is to address the gap between black and white connectedness.

- Howard County cited in national study for large gap between black and white youth disconnection rates.
- Maryland ranks 10th out of 10 states with highest African American population for black male workforce participation
- Baltimore is “the worst” among all metropolitan areas for economic mobility and future earnings

Pop Quiz!

Where might you find disconnected youth in your jurisdiction?

Identifying Disconnection Locally

Different municipalities have used different methods to identify disconnected youth in their locality. Some methods include:

- Youth turned away from summer jobs programs
- High school dropout rate
- Opportunity Index, [opportunityindex.org](https://www.opportunityindex.org)
- The U.S. Census Bureau/American Community Survey number of youth by county who are seeking work but unemployed
- Drop-in centers or connection centers
- Data sharing among local agencies and community organizations (homeless shelters, independent living programs, workforce development, local school system, home visiting programs)
- Street outreach / youth-led engagement

Promoting the Well-Being
of Maryland's Children

Gaps in Services

The competition for acceptance into a promising workforce program is fierce. As a result, youth are often left behind if they exhibit one or more challenges:

- Lack of reliable child care
- Criminal history
- Reading and math skills below 9th grade
- Transitioning from foster care
- High-functioning disability
- Lack of transportation

Opening Doors: Connecting America's Youth to Opportunity

Promising Strategies

The most common method of reconnection is getting a job.

Programs for reconnecting youth to work are as varied as the populations that they serve. However generally promising programs rely on four key principles:

- 1. Flexible pathways to educational attainment**
- 2. Multiple pathways to employment**
- 3. Soft skills and mentoring**
- 4. Community service/engagement**

Promising Strategies

Promoting the Well-Being
of Maryland's Children

1. Flexible pathways to educational attainment

- Create multiple paths to re-enrollment
- Increase access to alternative programming (accelerated, dual enrollment, bridge)
- Reduce “seat time”
- Encourage flexible scheduling
- Provide childcare

Promising Strategies

Promoting the Well-Being
of Maryland's Children

2. Multiple pathways to employment

- Prioritize businesses that hire youth.
- Develop a variety of experiences – paid work, apprenticeships, job shadowing.
- Engage employers
 - Use employer toolkit from White House Council for Community Solutions.
 - Create employer engagement strategy.
 - Employers will hire youth when it is easy to do and they believe it will be positive for their business.
 - Be aware of private sector initiatives to reconnect youth:

www.gradsoflife.org

100kopportunitiesinitiative.org

Promising Strategies

Promoting the Well-Being
of Maryland's Children

3. Soft Skills and Mentoring

- Employers are generally willing to hire youth with low job skills, but draw a line at poor soft skills.
- Five key skills:
 - Social skills (get along with others)
 - Communication skills (oral, written, non-verbal, listening)
 - Higher-order thinking (problem solving, critical thinking, decision making)
 - Self-control (delay gratification, control impulses, focus attention, manage emotions, regulate behaviors)
 - Positive self-concept (confidence, self-efficacy, self-awareness)
- Research shows that simple supports make a big impact on youth's success in the workplace (alarm clocks, text message alerts, bus fare).

Promising Strategies

Promoting the Well-Being
of Maryland's Children

4. Community Engagement

- Volunteerism and group membership are critical to building professional networks.
- Linked to sharp reductions in disconnection, *especially among the most disenfranchised.*
- Can be combined with soft skills training and mentoring.
- Need not be formalized or frequent to have an impact.
 - Participation in civic/service organization
 - Participation in ANY organization (religious, sports)
 - Volunteering
 - Working to solve a problem
 - Helping a neighbor

Promoting the Well-Being
of Maryland's Children

Collective Impact

One program cannot do it all.

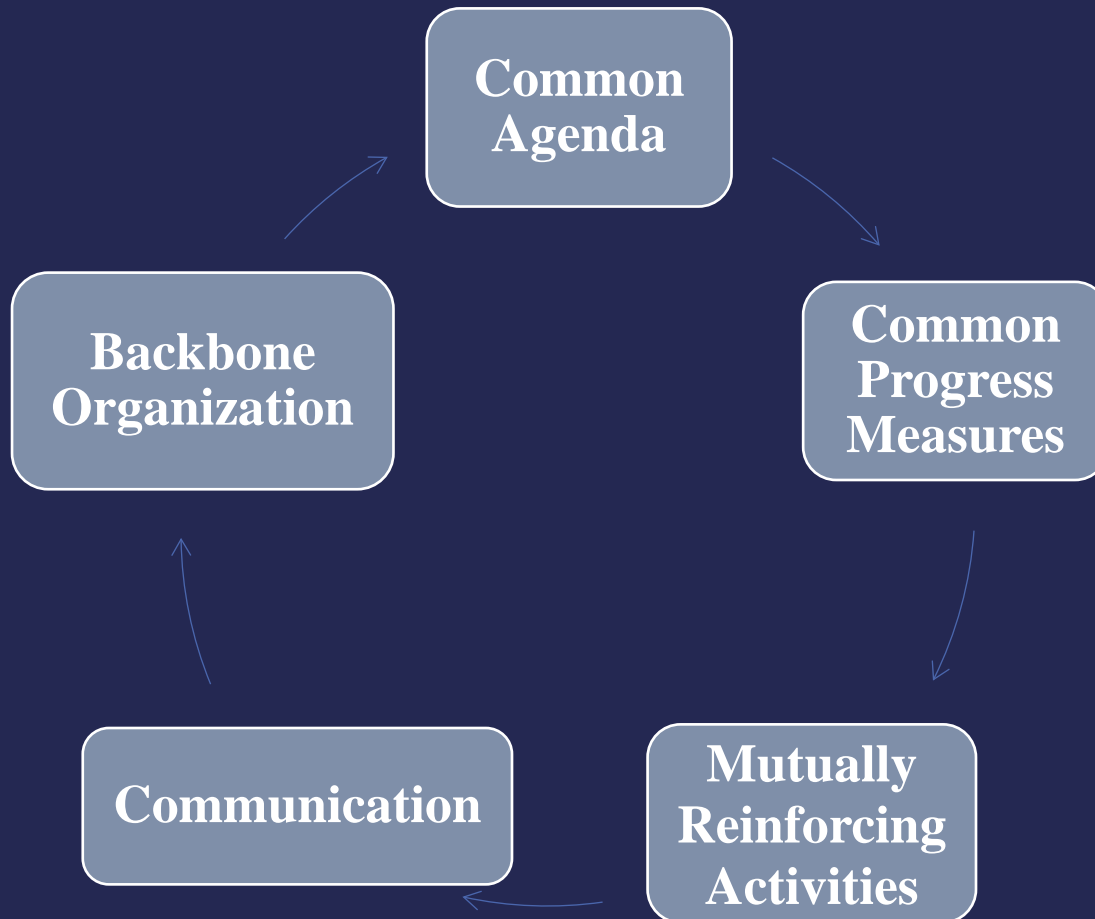

In 2012, the White House Council for Community Solutions identified over 100 communities who have “moved the needle” on youth disconnection (more than 10% reduction over a set period), and found that these communities approached the problem through **collective impact**.

Collective impact is a strategy where different organizations align efforts to solve a problem.

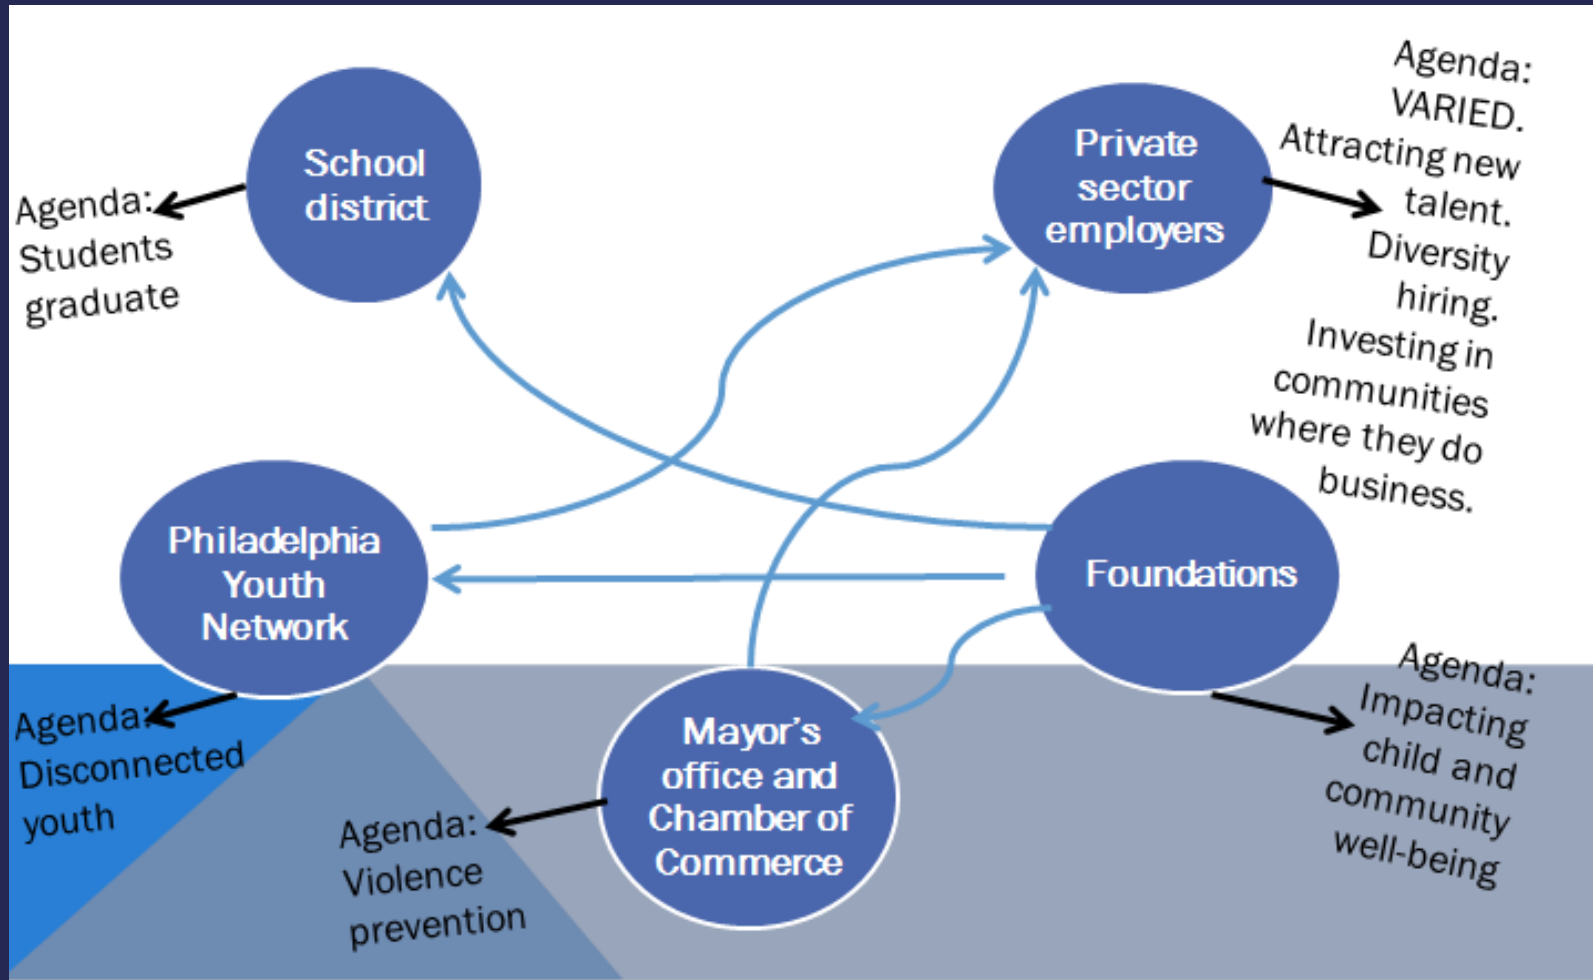

Promoting the Well-Being
of Maryland's Children

Collective Impact

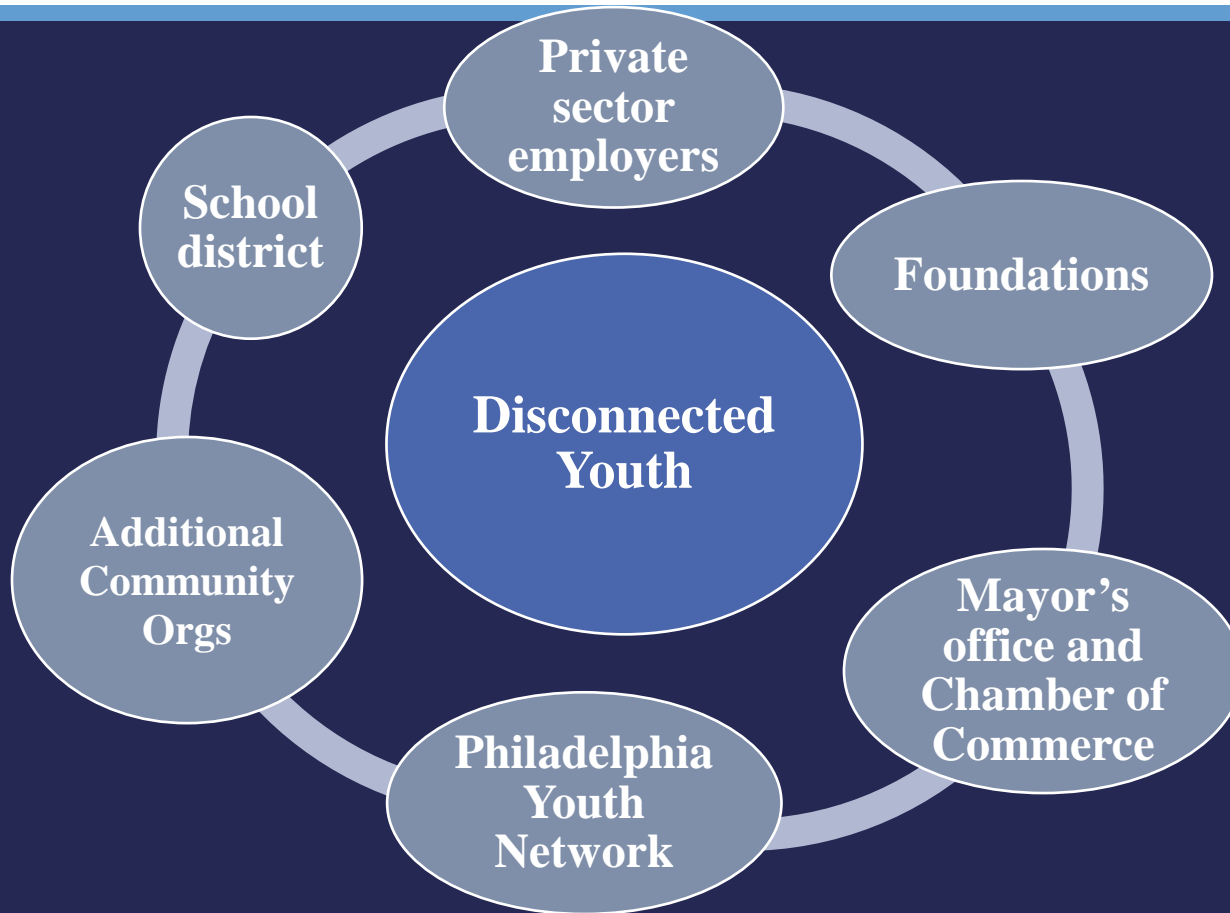

Case Study: WorkReady Philadelphia

Promoting the Well-Being
of Maryland's Children

Case Study: WorkReady Philadelphia

Common Agenda:
to connect young people to
the workforce

**Common Progress
Measures:**
of youth rejected by
summer jobs program who
are engaged in school and
work.

Backbone org:
PYN is single point of entry
for all youth and employers.

Case Study #2: College Promise

1. Start with data
Large #s of youth becoming disconnected after HS
2. Assemble all stakeholders
Public colleges, Mayor's office, K-12 school district, community orgs.
3. Unite around a common agenda and shared metrics
Goal: increased post-secondary enrollment and completion.
4. Develop a shared plan
First semester free tuition; waived enrollment fees; guaranteed admission; expanded scholarships.
5. Communicate!
Regular check-ins let stakeholders refine their tactics as necessary.
6. Results
43% increase in college enrollment, 500% increase in course completion.

Youth Disconnection 201

Starting in Fall 2016

Promoting the Well-Being
of Maryland's Children

BREAK!

See you in 15 minutes!

Promoting the Well-Being
of Maryland's Children

Activity: Part One

For the next half-hour, consider the following questions as they relate to your jurisdiction:

What do we know?

WHAT are your subpopulations? How many youth in your community are between the ages of 16 and 24? Each year, how many young people

- Age out of the foster care system?
- Fail to graduate from high school?
- Return to the community from juvenile and adult correctional facilities?
- Are served in shelters or temporary housing?

Are there **other unique challenges** facing young people or your labor market?

WHEN are youth getting disconnected? What proportion of (a) middle students never make the transition to high school; (b) students who enter the 9th grade graduate from high school four years later; and (c) high school graduates go on to some form of post-secondary education?

WHERE can you find disconnected youth? Are most dropouts, court-involved youth, and foster care youth concentrated in specific neighborhoods or high schools?

Thinking about disconnected youth that you serve, **what are the primary barriers** to work and school?

Promoting the Well-Being
of Maryland's Children

Activity: Part Two

For the next half-hour, consider the following questions as they relate to your jurisdiction:

What do we have to build on?

What opportunities exist for disconnected youth to reconnect to school, work, and caring adults? Are there enough options to meet the current need? What might you expand?

To what extent have key stakeholders come together to develop a shared vision and plan for helping disconnected youth? **Who are the stakeholders already at the table and who should be at the table?**

Do stakeholders working with disconnected youth regularly share information and coordinate their efforts? **What else could they do? Who could you connect?**
