Children's Service Outcomes Measurement System Overview

The Children's Services Outcomes Measurement System (CSOMS) has been operational since July 1, 2008 and was developed in accordance with Human Services Article, § 8-1004, Annotated Code of Maryland, to evaluate out-of-home placement program performance and to use standardized measurements to evaluate children's outcomes. CSOMS equips children's services providers with the ability to enter individual specific data in order to evaluate a child's placement, living environment, family situation, educational and vocational development, and outcomes associated with learning positive behavioral habits, as well as Child and Adolescent Needs and Strengths (CANS) assessments. CSOMS has the capability to generate reports at an individual, program, jurisdiction, or agency level and can be utilized for collecting case information, and monitoring by State and local agency staff.

From its inception, CSOMS has been used to gather information on services provided to children by Residential Child Care Programs (RCCPs). During the 2009 legislative session, statute mandated that Private Treatment Foster Care Providers (PTFCPs) were to begin utilizing the system as of July 1, 2009. The 2009 legislation also required foster homes approved by Local Departments of Social Services and residential programs operated by or under contract with the Department of Juvenile Services (DJS) (except detention facilities and shelters) to use the outcomes measurement system as of July 1, 2011. Public Foster Care and DJS facilities serve populations that are different than RCCPs and PTFCPs. Both the Department of Human Resources (DHR) and DJS have implemented data collection systems that are mandated through other statutes. Federal requirements restrict staff for those agencies from entering child-specific data into multiple systems. Workgroups are now in operation to determine solutions to the various data-entry requirements so that standardized performance measures can be used to evaluate a broad array of out-of-home placements (more detail in the System Improvement Process section below).

CSOMS Implementation Status

Since the beginning of FY2008, 12,445 new cases have been entered into CSOMS (Table 1). The highest number of cases was added during FY2009 and since then, there has been a decrease in the number of cases added each year. The number of "Newly Served" cases, or new cases that have been added to the system, is the best indicator of how many cases are in CSOMS of the potential number of placements served by RCCPs and PTFCPs, the main types of service providers that enter data into CSOMS.

	FY2008	FY2009	FY2010	FY2011	FY2012
Newly Served	1257	3215	2840	2596	2564

Another indicator of the overall utilization of CSOMS is the total number of placements or cases “Served” during the fiscal year, which is the number of cases that were open on the first day of the fiscal year plus all the cases added until the end of the fiscal year (Table 2). This number is less reliable than the number of “Newly Served” cases, however, because at least some of the cases that are opened or created in CSOMS were never closed or discharged when they should have been. The result is that, in each year, there appears to be an increase in the number of cases served, but only because closed or discharged cases remain categorized as being open and add to the total, while a decreasing amount of new cases are actually added each year. This is further evidenced by a decreasing number of “Exits,” or case discharges, each year since FY2010 (Table 2).

	FY2008	FY2009	FY2010	FY2011	FY2012
Served	2401	5603	6446	6711	7146
Newly Served	1257	3215	2840	2596	2564
Exits	13	1997	2331	2129	1940

If the number of newly served cases is the most reliable CSOMS data for understanding active cases in CSOMS, then overall utilization of CSOMS must be understood in terms of how many cases are entered into CSOMS each year out of the total number of cases that could potentially be entered (Table 3). A percentage of the number of cases served, newly served (entered), and exited (discharged) out of the total number of RCCP and PTFCP cases for each fiscal year is shown in Table 3.¹ The percent of cases that are entered into CSOMS each year out of the total

¹ Source: State of Maryland Out-of-Home Placement and Family Preservation Resource Plan, FY2011. The number of potential cases in CSOMS is the number of RCCP and PTFCP cases served, newly served, and exited during each fiscal year. An estimate was calculated by multiplying the total number of Community Based and Family Home cases reported by all agencies by the percent of Community Based placements that were RCCP cases and the percent of Family Home placements that were PTFCP cases

number of RCCP and PTFCP cases has been declining since FY2009. As of FY2011, it is estimated that only 52.3% of the total RCCP and PTFCP newly served cases had been entered into CSOMS and a lower number of these cases, 40.9%, were discharged from the system out of the total number of discharges for that fiscal year.² This indicates that not only are many cases not being entered into CSOMS, but also that a greater number of cases are not being updated in a timely manner.

TABLE 3: Percentage of Cases in CSOMS Out of Estimated Total Pool

	FY2009	FY2010	FY2011
Served %	61.8%	75.3%	80.4%
Newly Served %	61.9%	57.1%	52.3%
Exits %	36.4%	43.8%	40.9%

In FY2012, DHR accounted for the highest percentage of referrals for cases in CSOMS at 80% (Appendix). DJS had 16.3% of referrals and a small percentage of the remaining referrals came from Out-of-State placing agencies, Maryland State Department of Education (MSDE), Developmental Disabilities Administration (DDA), and in and out-of-state private payers. The referring agency is identified when a user enters a new case into CSOMS.

System Improvements Process

In 2010, GOC convened CSOMS stakeholder groups to make recommendations for system enhancements. The groups were organized into three categories – Outcomes, Policy, and

based on the one-day census totals (on January 31st) for each corresponding fiscal year. This calculation renders an approximate amount based on the assumption that there is no significant difference between the length of stay for RCCP and PFTCP cases as opposed to other Community Based or Family Home placements, so that the rate of entries and exits correlate to the rate of total served each year.

² FY2012 data is not noted because this data will not be available until the release of the FY2012 State of Maryland Out-of-Home Placement and Family Preservation Resource Plan, projected for December, 2012.

Information Technology (IT). In 2012, GOC reconvened the stakeholder groups beginning in August 2012 to build on the work that was previously done. This work is supported through a contract with the Institute for Innovation and Implementation at the University of Maryland School of Social Work.

The purpose of the workgroups is to make recommendations for system enhancements that will increase the usefulness of CSOMS to providers and State agencies and improve policies and procedures to ensure that the data is entered consistently, timely, and accurately. The workgroups will accomplish these objectives by carrying out the following responsibilities:

- Policy:
 - o Develop a plan for the utilization of CSOMS through policy and procedure and crosswalk with current statutory, regulatory, and contractual requirements.
 - o Recommend reports that can be generated to monitor the continued implementation of CSOMS.
- Outcomes:
 - o Propose methods for measuring outcomes using data and information in CSOMS.
 - o Suggest reports that would be useful to evaluate children's outcomes on a clinical/treatment level, as well as to evaluate effectiveness on an aggregate/program level.
- IT:
 - o Develop the system based on the recommendations put forth by the Policy and Outcomes workgroups.
 - o Find ways to facilitate essential information use and exchange while safeguarding children's confidentiality.

Each workgroup will continue to meet on a monthly basis and work progress will be tracked using an online dashboard where participants can post research materials, have discussions, check meeting notes, and monitor project management. Participants include representatives from a variety of children's residential service providers, State agency monitors and personnel, program administrators, case managers, clinicians, and advocacy groups. There will be overlap in the membership in each of the workgroups because many of the objectives and activities of each group will impact the work of the others. The IT workgroup will phase-in by late October 2012 to begin implementing the recommendations of the Outcomes and Policy workgroups.

CSOMS Training and Technical Assistance

GOC staff has conducted basic training sessions on CSOMS, which have been offered to service provider personnel, including program administrators, clinicians, case managers, and any staff who enter data into CSOMS or who utilize CSOMS as a tool for program monitoring. The training covers a range of topics from entering a case into CSOMS, to managing a case, completing a CANS assessment in the system, using the Resource Directory, adding and editing foster parent information, and utilizing system reports. All the information for the service provider training is available on the GOC website and includes instructions for performing case management functions, utilizing system tools, and the presentation used during the basic

training. An online training is being developed and should be available by the end of calendar year 2012 so that providers can access a video of the whole training program, and any individual part of the training at any time. A training program for local agency staff is also being developed so that agency staff will know what information is useful to them for case and program monitoring purposes.

Technical assistance is offered by GOC to service provider personnel and State or local agency staff who have created an account to use CSOMS. GOC system administrators also assist with adding and managing user accounts.
